# WEATHER

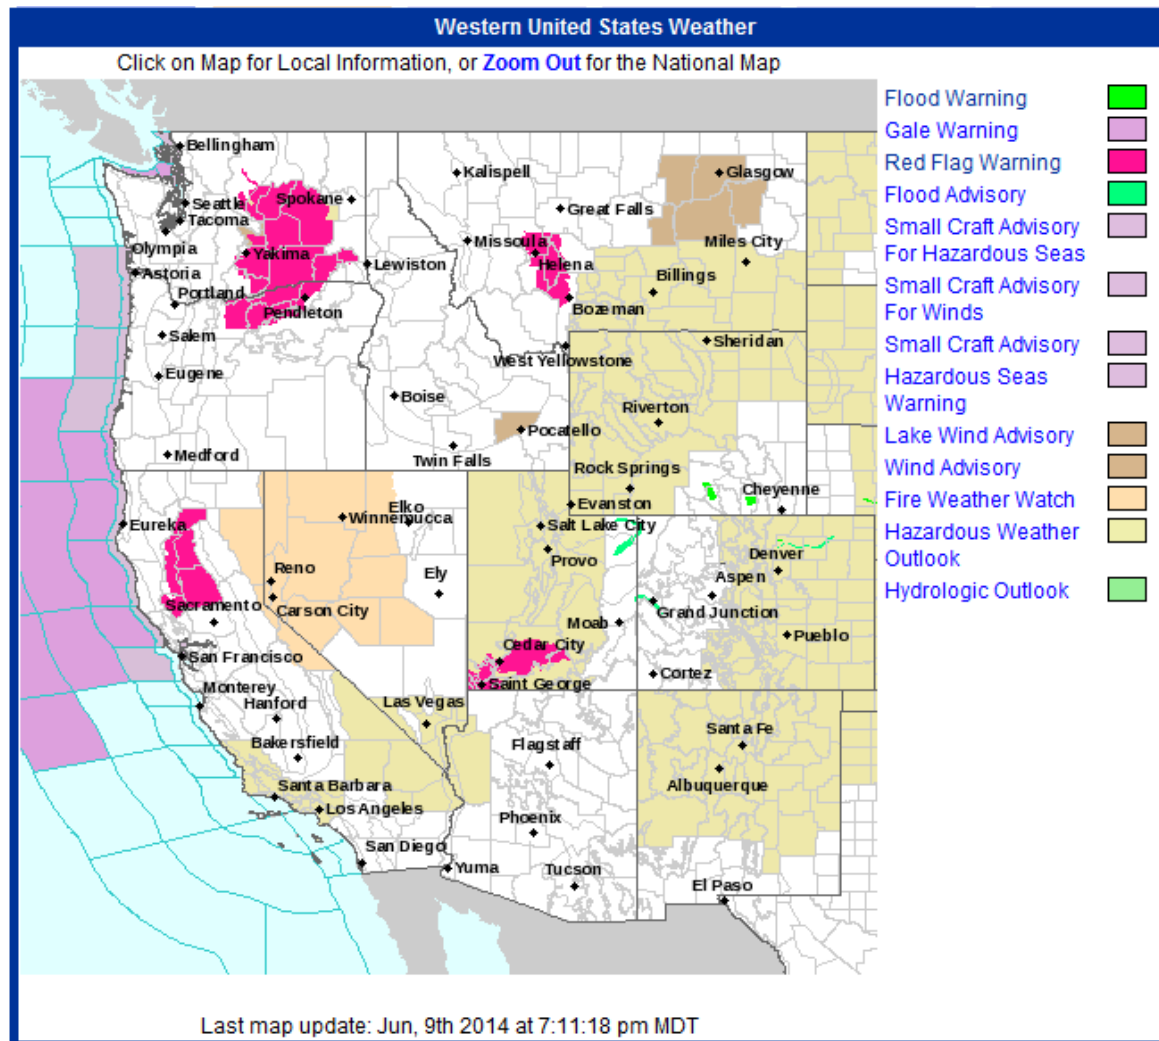

## NORTHERN CALIFORNIA

A weak low moved toward the coast today which could lead to the development of some evening thunderstorms over the western mountains from just north of Clear Lake to the Trinity Alps area. An offshore low will slowly move inland Tuesday and bring a chance of isolated afternoon/evening thunderstorms to the Sierra from Tahoe southward. Breezy northerly winds, very low afternoon Relative Humidities (RH) and poor overnight RH recovery will persist for the Sacramento Valley and surrounding foothills through Tuesday, although the winds are likely to be noticeably lighter this afternoon.

## SOUTHERN CALIFORNIA

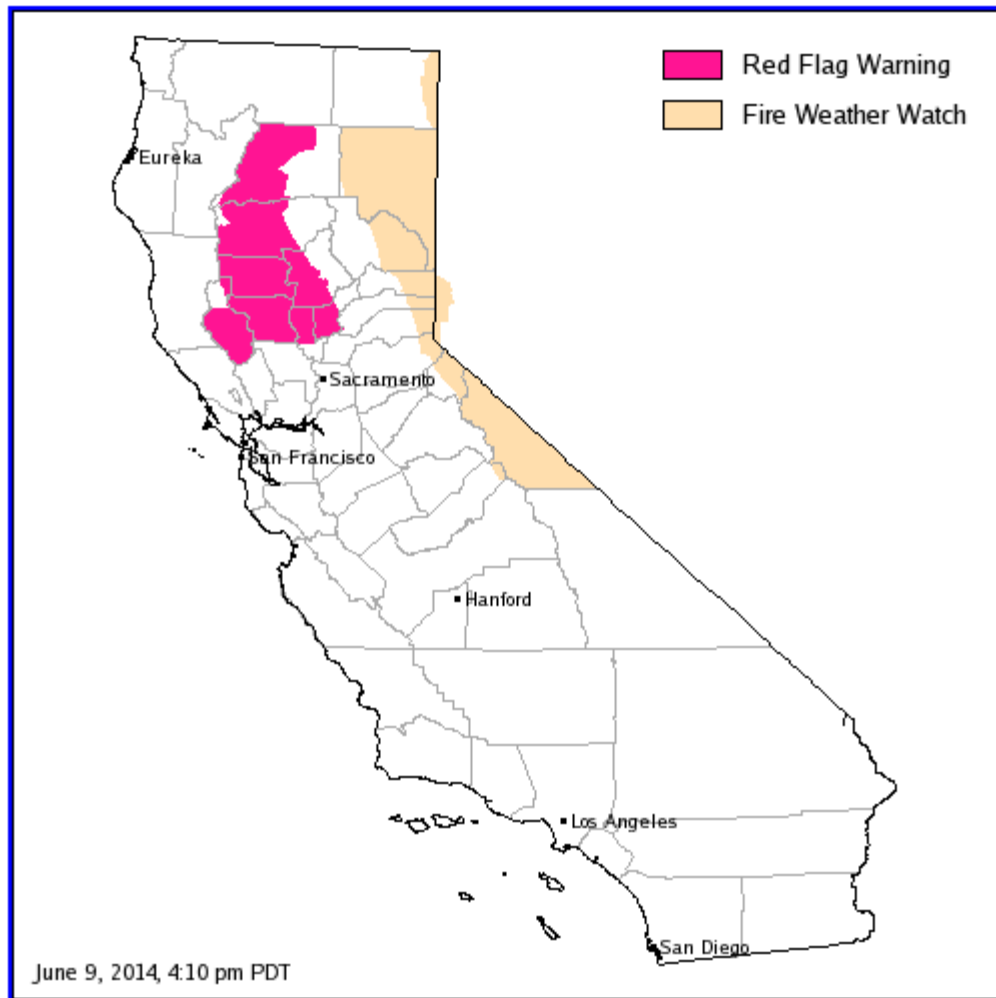

High pressure over Southern California will give way to an approaching low pressure system this evening. On Tuesday, a weak low pressure system will move into the central portions of the state. This will help to lower temperatures across the inland areas by around 4-7 degrees. Isolated thunderstorms will be possible in the afternoon along and east of the Crest, from Kings Canyon NP on northward. The low will depart the area on Wednesday but there could still be a few isolated thunderstorms over the high Sierra in the afternoon.

##### **If traveling from Rancho Cordova/Folsom to Natomas/Davis:**

- Use US-50 West to Business-80 North to Watt Ave North, to I-80 West.
- Do not use US-50 West to Davis or US-50 West to I-5 North to Natomas.

##### **If traveling on Business 80 West during Phase 2 (Closed connector ramp from Business-80 West to US-50 West):**

- Get on US 50-E and use Hornet Drive (Howe/Power Inn exit) to turn around onto US-50 West
- For WB Business 80 to downtown, use Highway 160

\*\*\*Motorists traveling to the Lake Tahoe area can avoid the project area congestion by taking I-80 E

# **CAL OES ACTIVATIONS**

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

## **Cal EOC Incident – 2014 Drought**

### **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

**\*\*As our state's rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly. This winter's below average rain and snowfall worsens conditions in this third straight dry year.\***

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

## Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at 0% of normal as of June 3.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
